WANT LIST OF SELECTED USSR SERIAL PUBLICATIONS

Attached hereto is a list of selected USSR serial publications which are desired by the several Washington Federal agencies participating in the Committee on the Procurement of Foreign Publications of the United States Intelligence Board (PROCIB).

Certain of these titles were denied for export from the USSR as early as 1947, and others have been similarly unavailable through overt collection media in subsequent years. It is possible that some of the publications listed may have ceased publication; the necessary confirming information to that effect, however, has not been available. There are a few instances in which only scattered issues of a given title have been obtained; these titles have been included in the present list.

Any of the publications listed on the attachment which are available to field collection arms should be procured either in the original or a reproduced form. If the items themselves cannot be procured, any information concerning them should be forwarded to Washington. Any publications obtained and/or reports on same should be forwarded to Washington under the subject: USSR Publications, marked to the attention of the appropriate USIB/PROCIB member.

The attached listing is to be considered unclassified after removing this cover sheet.
